Jess,

I have heard back from the Mayor. He has suggested combining sides 3-4 on a single slide entities, "Crime Per Capita Comparison." Thoughts?

Additionally, if you look back as last year's slide (attached), the 2016 Part II crimes total was 2. The new slide has a total at 11, a nearly 600% difference. Can you please explain the difference? The higher numbers for 2016 provided this year suggest a much better year-over-year improvement, which may not be accurate.

Thanks,

Kevin

Kevin R. Kearney
